PROFESSIONAL EXPERIENCE

Front-End Engineer at Wildkard, *Remote* (Nov 2021- Ongoing)

React.js, React Native, Graphql

- Engaged in the creation of the second version of the Wildkard App.
- Created over 16 screens for the application; including but not limited to creation of groups & events, profile screens, settings screens and all of their functionalities.
- Scheduled and lead bi-daily stand-ups as well as keeping in check the CI of the project.

Front-End Engineer at Monk Medical(Keco Group Inc), *New York, USA* (Mar 2021- Aug 2021)

React.js, Firebase, Node.js

- Created and maintains the website for the company at https://monkmedical.com
- Rehashed and reimagined the informative website to reflect best on the company.
- Produced UI elements for the company, from the ground up, with clean readable code

Front-End Engineer at Elta 360, *Istanbul, Turkey* *(Oct 2020 - Ongoing)*

React.js, Firebase, Node.js

- Developed and documented the website routing infrastructure for the Elta 360 platform.
- Revamped the account registration process to utilize reusable, responsive components.
- Rebranded, individually, the grid & list based homepage with the use of custom, intricate grid elements.

Data Scientist and Software Engineer Associate at Anodot, *Tel Aviv, Israel* (June 2019 – Aug 2019)

React.js, R

- Created a Web App which eased anomaly data interpretation by creating interactive graphs, used by sales engineers to help onboard new customers.
- Ran weekly meetings with the sales engineers and customers to enhance the user experience.

Founding Member and Developer at Hearo, *Istanbul, Turkey* (Feb 2018 – Sep 2018)

React Native, Auth0, Firebase, Xcode

- Co-Founded an application that easily transcribes voice messages and forwards the transcriptions.
- Managed user interface and user experience development including the homepage.
- Demonstrated an understanding of application ecosystems through a successful deployment launch on iOS.

PROJECTS

Tadah|To-do Listing and Sharing Application *(Dec 2020 - Ongoing)*

React.js, React Native

- Undertaking a web based application for day to day sharable task management utilities from ideation stage to development.

<u>Portfolio Website</u> *(Dec 2019 - Apr 2020)*

React.js

- Implemented a mobile-friendly portfolio website with a dark-mode switch, created entirely using React.js.

LEADERSHIP POSITIONS

Peer Mentor/Teaching Assistant at Northwestern University, Evanston, IL *(2017 - 2020)*

- Supervised the classes Fundamentals of Computer Programming I and II, Introduction to Artificial Intelligence and Human Computer Interaction.
- Responsibilities included creating and grading both homework and exam questions and lead discussion sections and office hours.

President and Project Manager at IEEE Northwestern, Evanston, IL *(2017 - 2020)*

- Organized and managed social events for the Electrical Engineering and Computer Science community in Northwestern.
- Lead IEEE for a whole year as President. During the year several events were held including a project showcase, where the best computer science students displayed projects they created throughout the year.
